

# Computer Notes

Prepared by AI Learning Assistant

## ■ Index

1. Introduction to Computers — Page 3
2. Programming Basics — Page 4
3. Internet and Networking — Page 5

## Unit 1: Introduction to Computers

This unit discusses the evolution of computers, types, and their importance in modern life. It also introduces basic hardware and software concepts.

## Unit 2: Programming Basics

Students learn about logic building, algorithms, and flowcharts. The unit also introduces basic coding principles in languages like Python.

## Unit 3: Internet and Networking

This unit explains how data travels over networks and the fundamentals of IP addressing, routers, and cybersecurity awareness.
