■ Index

1. Algebra Basics — Page 3
2. Geometry Fundamentals — Page 4
3. Trigonometry — Page 5

Unit 1: Algebra Basics

This unit introduces algebraic expressions, variables, and equations. Students learn to manipulate symbols and form relationships between quantities.

Unit 2: Geometry Fundamentals

Here, students learn about shapes, angles, and properties of geometric figures. The unit emphasizes logical reasoning and problem-solving.

Unit 3: Trigonometry

This unit covers trigonometric ratios, functions, and identities. It connects geometry with algebra and is essential for advanced mathematical understanding.
